Shortgrass Prairie Scavenger Hunt

Time to think like a wildlife biologist! Observe and record as many interactions as you can.

- Evidence of a **prairie dog colony** (Hint: listen for calls and look down for burrows)

- A place that an animal might **hide** from a **predator**. _____

- Find a **nest**. Where is it? What does it look like? _____

- Find a **native** prairie plant. What do you notice about its appearance or size? _____

- Evidence of an animal **track** (Hint: footprints, feather, fur, scat...). Take a guess who it belongs to. _____

- Three pieces of **litter** (throw them away even if it wasn't yours) _____

- A spot you would like to **live** if you were an animal here and why. _____

- Something with **symmetry** (Hint: think leaves, flowers, faces...) _____

- Find a **bird**. What is it doing? _____
